ALWIN RIYAS P

+91 6385360744 alwinriyas16@gmail.com Chennai, Tamil Nadu, India

SUMMARY

Cybersecurity undergraduate with hands-on experience in security assessment, vulnerability identification, network security, and Python-based security tool development. Experienced in practical cybersecurity activities through an internship at EyeQ Dot Net and independent projects, including ODIN (Security Scanning CLI) and VERITAS (File Integrity Monitoring). Proficient in Linux environments and familiar with OWASP Top 10 and cybersecurity tools. Completed the Google Cybersecurity Professional Certificate and TryHackMe Pre Security. Strong interest in security monitoring, threat detection, log analysis, and strengthening organizational security.

WORK EXPERIENCE

June–July 2026

CyberSecurityAnalyst Intern, EyeQ Dot Net Pvt. Ltd.
Remote

• Participated in practical cybersecurity internship activities involving Red Team assessment services and assigned-target
security checks.
• Completed mentor-guided tasks, identified potential security loopholes and submitted reports.
• Gained exposure to OWASP Top 10, Kali Linux, bug hunting, VAPT and ethical-hacking fundamentals.

PROJECTS

ODIN—SecurityScanningCLI | Python · v0.9.0

Modular Python security-scanning CLI with passive scanners, controlled active checks, scan profiles, risk scoring and terminal, JSON, HTML and SARIF reporting. Project documentation records 7 scanner modules and 35 tests.

VERITAS — File Integrity Monitoring | Python · SHA-256

Python file integrity monitor using SHA-256 baselines to detect modified, newly created and deleted files; includes security-focused logging, input validation, symlink protection and automated tests.

EDUCATION

B.E. Computer Science and Engineering (Cybersecurity)

Loyola Institute of Technology, Chennai | 2024–2028

Certifications & Training

Google Cybersecurity Professional Certificate — Google / Coursera
Connect and Protect: Networks and Network Security — Google / Coursera
TryHackMe Pre Security — Completed

KEY SKILLS

Security: Network security, web security, vulnerability assessment, VAPT, OWASP Top 10, security fundamentals

Tools: Kali Linux, Linux, Splunk, Wireshark, Nmap, Burp Suite, tcpdump, TryHackMe

Programming: Python, SQL, Bash

Engineering: Git, Docker, CLI development, automated testing, structured reporting
